About This Document

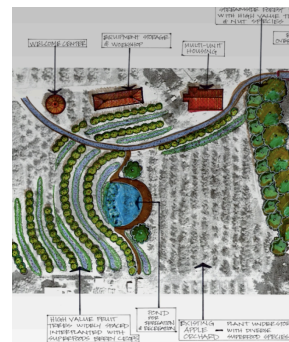

This sample shows the design process and types of deliverables you'll receive when working with me. Services are modular, you can engage phases independently or sequentially, proceeding at your own pace and budget.

The design process works from general to specific. I can take the process as far into detail as you need for successful implementation.

> Quick-Turn Marketing Drawing (Optional)

Fast concept for presentations | 2 weeks

To-scale illustrated concept overlaid on satellite imagery, a graphic brainstorm to inspire stakeholders before the full design process begins.

[Partial Image Sample]

> Phase 1: Site Analysis Report

Foundation for design decisions

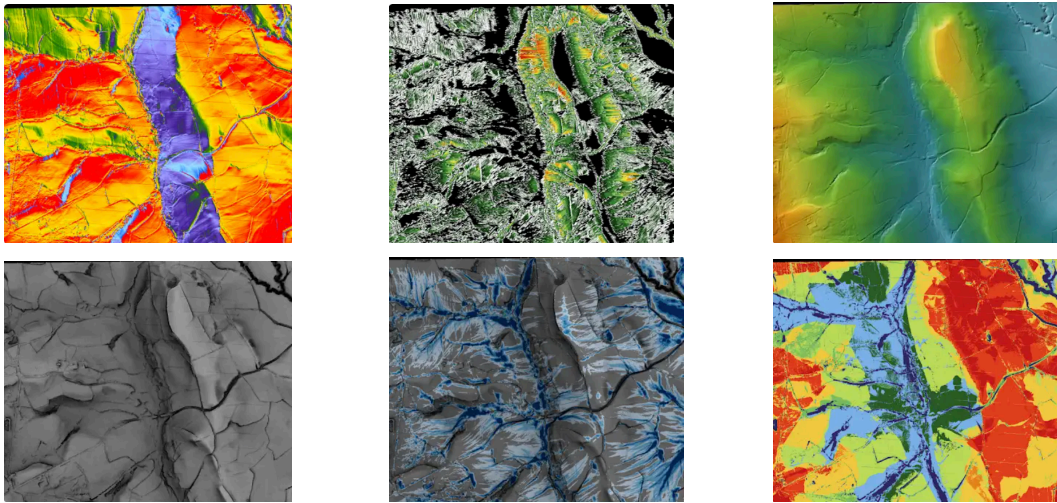

You receive: Comprehensive PDF with written analysis + professional maps including:

- Topographic analysis (contours, slope, buildable areas)
- Hydrology (flood zones, drainage, water access)
- Soil maps with descriptions
- Climate analysis (frost, wind, wildfire, solar access)
- Analogous climate comparisons

[Partial Sample: contour/topographic map]

Add-on: Professional Survey Package with 20+ layers including terrain, erosion risk, drainage, viewshed, wind exposure

> Phase 2: Conceptual Design Plan

Collaborative placement of elements

You receive: To-scale PDF with graphics + text showing placement of:

- Water systems (ponds, irrigation, drainage)
- Access routes and paths
- Vegetation zones (orchards, crops, hedgerows)
- Structures and utilities
- Usage zones

Iterative process with ongoing feedback and revisions until you're satisfied.

[Sample: Partial conceptual plan example]

> Phase 3: Detailed Artistic Plan

Refined rendering for marketing

You receive: High-resolution artistic plan with:

- Plant lists with species and locations
- Detailed drainage with earthwork calculations
- Architectural recommendations
- Hardscape specifications
- Management strategies

May include site visit for design refinement.
